A question for the OS3.2 volunteer developers, who presumably also have access to the OS4 Repository:

FORMAT LONGNAMES (OS3.2)

In the OS4.x and Enhancer Software [Format V54.1 and V46.11](#) system command this is:

FORMAT LONGNAME (OS4 & Enhancer Software)

LIST GROUP (OS3.2)

In the OS4.x and [Enhancer Software List V54.7 and V46.7](#) system command this is:

LIST GROUPS (OS4 & Enhancer Software)

Is it better to keep things the same as much as possible across OS4 and OS3 ?
