At least we have it and it's working, so good for future bug hunting sessions.

i also just found my old bug report on "that other switch that wasn't working", maybe you remember?

It was the profiler (-pg) that is crashing.

See here:

<https://github.com/sba1/adtools/issues/72>

Though i don't know if it is a problem of gcc or one of the many adtools.

I'll drop it here so it gets some update...
