URL:

Another little update from AmigaOS4 devs, fire up your amiupdates! This time this is C:Date and Prefs/Time which were updated.

Remember, you need previous amiupdate updates to be installed as well, and i.e version.library should be 53.18+ as before.

In C:Date there were removed the obsolete timesync.library RS\_ERRSTR tag for the RemoteSync() call and replaced it with the new tags; RS\_ERRBUFFER and RS\_ERRBUFFERLEN.

For Prefs/Time, were added RS\_ERRBUFFER & RS\_ERRBUFFERLEN tags to time.c RemoteSync() call and removed the obsolete RS\_ERRSTR tag.

The update is necessary to avoid crashes and bad behaviors in those commands.

Thanks to Colin and Simon for!
