Hi to all and thanks for your help.

The C/Date file has not been updated. It is still in its version 53.7 of 08/18/20. The SYS:libs version.library is 53.18. I still have the old Hyperion Copy, List, and Version files.

To make AmiUpdate work, I only activate the update.amigaos.net server. When AmiUpdate asks me for the Username and Password, I provide the one that allows me to register my softwares on the Hyperion site (is this the correct one?).

However, the update does not work.
