1. Try as I might, I cannot find this file. I also used the find utility, besides just opening the directory to look for it. I get this: System:System/AmiUpdate/AmiUpdate  
and this:  
System:System/AmiUpdate/RollBack/2021-01-20/AmiUpdate

But I don't find the SiteList file anywhere.

2. Over time I have added server addresses to AmiUpdate. For good measure and once and for all, what are all of the working sites to use for searching with AmiUpdate? Currently I have:

amiupdate.codebench.co.uk

update.amigaos.net

[www.amiupdate.net](http://www.amiupdate.net)

It also searches ww2.hyperion-entertainment.com. Entering my hyperion username and password there lets it scan there as well even though it's not listed in my servers.

Paul

edit: I have now added ww2.hyperion-entertainment.com to the server list, but still get nothing but the RAR update listed.
