@Rolar

I see reports that it is working with x86 linux distros. Some users with problems simply forgot to unmute the card.

Never tried linux on ppc so I'm not sure how mature that is.

But the audigy FX is nothing special. So there should be no reason why it shouldn't work.

Quote:

BTW, would it be possible to use the hdmi audio also with your driver, under AmigaOS?

No, but that has a different reason.
