There are currently only three distros which are still updated and usable in X5000:

- MintPPC (which is best kept up-to-date)

<http://mintppc.nl/>

- Fienix (which is the most Amiga-friendly as the keeper has X5000)

<https://fienixppc.blogspot.com/>

- Ubuntu 16.04 (only minor updates, this will soon be unsupported)

But the kernels for X1000/X5000 are common for all distros, and they are very well kept up-to-date, thanks to the work of 'xeno74' (see <https://forum.hyperion-entertainment.com/viewforum.php?f=58>).
