Uhm, just tried on my AmigaOS 4.1 FE Update 2 installation using QEMU 6.0 with no luck.

Used the latest archive on os4depot then launched the usual QEMU command adding "-device intel-hda"

```
qemu-system-ppc -machine sam460ex -m 2G -rtc base=localtime -device intel-hda  
-device ide-hd,drive=disk,bus=ide.0 -drive  
file=amigaos_4.1_fe_upd2.img,format=raw,id=disk
```

as it did not work, tried adding "-device intel-hda -device hda-output", again with no luck

```
qemu-system-ppc -machine sam460ex -m 2G -rtc base=localtime -device intel-hda  
-device hda-output -device ide-hd,drive=disk,bus=ide.0 -drive  
file=amigaos_4.1_fe_upd2.img,format=raw,id=disk
```

On the AHI prefs still no HD audio device shows up

This is how the audio board appears on Ranger
