@geennaam

Everyone is entitled to their own opinion.

I applaud the work that A-EON team and others have done to enhance our OS4 systems.

I own a very old MicroA1 system running the following:

AmigaOS 4.1 FE Update 2 + selected parts of Enhancer Software v1.5

And other 3rd party software products.

And, yes, I purchased the Enhancer Software Special Edition Version 1.5 from AmigaKit sometime after Hyperion released AmigaOS 4.1 FE Update 1 ... during those years when Hyperion seemed to be asleep.
