The solution cans with a direct Paypal account for the author link for example like the WArMUp association and MorphOS store, or with someone that collect the donations and after the users of this site can choose or voted the people, but here the problem are the money and to have show the fonts and bills of money got and donated, and the donate computers, this is other problem, I knowed one case of one people that in the bad Amiga times and some company gifted Pegasos I for developers, this man never did programs and games for MorphOS to promote both the machine and OS, and this situation for the users can bother and angly them.
