@BSzili

its a shame to keep bugs that can corrupt memory in programs, pressing ignore is not a fix.

The problem of porting it over to warpos as it is now, you are going to port over the bugs as well.

the WarpOS version won't run on many different AmigaONE systems with different CPU's, only older G3/G4/AmigaOS4.0, and only partially if runs at all on AmigaOS4.1
