Tried the game on my X5000 and works great. On my system I got 60fps on 1024x768 and ~30fps 1280x1024 with graphics details set on full, and fullscreen, using the version for 040 CPUs the game works great and didn't have any issues, so far, except that it is a little bit hard for a start.

Thank you for this awesome release.
