MV1.3.0

MediaVault error

There was an error with the returned data.

Please try again or check your network.

Steps to reproduce:

- 1) Start MV
- 2) Type "Piraat" into the name field (doesn't matter actually, but it won't take as long as only one station will come up)
- 3) Click once on the station
- 4) When the play button becomes available, click on it to start AmigaAmp and the radio
- 5) Wait until the stream plays and now click on either "Trending" or Popular"

It will *\*always\** trigger this error which makes me believe this is a bug.
