Thanks... Unfortunately that was not the today's livestream from Nebelhorn Trophy but some older stream from Germany's Championships ;). How did you get it? There may have been a link for it on the Nebelhorn's page, if you just looked through the code.

But I tested it anyway with VLC in X5000 and it works... CPU load was smaller than I expected, even though it is 1080p.

I hope I can find the right link for Friday's stream... ([https://sportdeutschland.tv/deutsche-e ... belhorn-trophy-2021-tag-2](https://sportdeutschland.tv/deutsche-e...belhorn-trophy-2021-tag-2))
