IBrowse Javascript alert

Author: : Swoop

Date: : 2007/8/20 12:39:29

URL:

Whenever I go to, or change a page on [this site](#) I get the following javascript alert error

Quote:

**DHTML TIP MESSAGE VERSION 1.5 ERROR NOTICE.
<DIV ID="TipLayer4"></DIV> tag missing or its ID has been altered**

Anyone have hints what I can do to remove it, some setting or other?
