What about CybervisionPPC?

**Remark: If you can't say due to NDA, just don't!**

I know that there is no P96 driver for 68k, i am stuck with  
CybergraphX, (which is not a bad software, but unrcontinued)  
Will there be an OS4 native P96 driver, or will the  
CybervisionPPC not be supported at all...  
which would be a shame, of course!

Reminds of the fact, i don't even know if i'm talking to an OS4 betatester, heh 😊
