Sorry but I don't have Final yet.

May be helpful if someone put here a link to the OS 4.0 Final download on Hyperion's page.  
I have tried with the code of the pre-release CD several times but cannot register sniff.

I think is legal cause I am a registered user of the  
Amiga One and OS 4.0.

It will be very helpful and Hyperion doesn't do anything to  
give me the pleasure to run OS 4.0 Final as ASB-Computer,my  
dealer doesn't too after some e-mails.

I'm fully committed to the cause!
