I'd be more than happy to test the CTorrent port for you if you want. On OS4 Classic of course. Years ago, a person I knew on IRC did a ctorrent port, I managed to successfully setup the necessary MIME settings in IBrowse so it was all automated from the torrent sites I'd visit.

BTW, I live on Transmission (nice and clean) on my Macbook Pro, so I do the odd torrent :)

edit: Just realized. This is the first post I've done on these forums.
