Huh?

/OS4.0> cd SDK/local/c

/OS4.0/SDK/local/c> list pat = s#?

abc-shell 52.10

Can anyone explain this anomaly? I have SDK_51.5_light.lha installed long ago - 2006.

I'm fairly certain I updated ABC-shell to 52.10 last November. I used 'Find' to look for any other ABC-shell and the above SDK directory is correct.
