The last beta trashes the .torrent file when exiting gui while it still downloads. The .torrent file gets 144bytes and is unusable. Please fix this ASAP ;)

Another thing i discovered is that it gets the text "warn, connect to tracker failed: Connection timed out" in the output window rather than in the gui.

Another thing is that it shows too big filesize UP. I have 8mbit/1mbit so lets say 120KB is what i would be able to send UP. But i had speeds showing like 800KB hehe :)
