Just a thought on this, maybe it should be in AmigaGuide and published in different parts for different revisions of the OS.

Does anyone know if there is a tool for generating AmigaGuides to another format (like a Wiki)?

Would something like [ag2html](#) or [guide2html](#) from Aminet work? I haven't tried them myself, but you might want to take a look at them.

The FAQ in AmigaGuide is an excellent idea. Great to see you're working on it.
