The parameters after resolution are for color modes.

e.g. 8bit, 16bit or 32bit.

If you enter `MODE=800x600@60` you will get a 800x600 resolution at 60Hz refresh with all three color modes selectable. I usually just need a 32bit mode so I remove the rest with `MODE=800x600x32@60`. As you saw you may enter two modes aswell separated by a comma.
