Wow, just looked at the screenshots, so many plugins!  
It's really good to have support for so many formats.

I have to thank the following people for all the great plugins:

**Olle** - The first person to write a 3rd party plugin for  
TuneNet. Hope you get well soon!

**Curty** - For adding AAC, FLAC and the upcoming SID and YM  
plugins. I believe he has a few more also! 😊

**SpotUp** - For compiling lib after lib for OS4! Much appreciated!

... let's hear it for the people above eh! 🍷

Cheers,  
Bean.
