Have you emailed the authors

Yes, but they doesn't seem to be very communicative. Perhaps my e-mails were just caught by their spam filters.

or used the web site, to tell them what features you want?

The web site is unusable with Aweb and IBrowse... 0_o All links leads to the homepage. You can check it up for yourself if you like. Perhaps i will try to access it with OWB 68k later, but, in any case, i'm sure that they are intelligent enough to know what important features SimpleMail misses. I don't think that i have to say anything they are not aware of, already. 😊
