Opening OWB from IBrowse

URL:

Hi all,

I open OWB from a contextual menu in IBrowse. It is set with these arguments:

```
*>NIL: %u
```

but I always have opening console windows called "IBrowse output" that say:

```
postProgressFinishedNotification
```

How can I get rid of it?

I tried >NIL: *>NIL: %u but the page doesn't load into OWB...

Thanks
