URL:

OKey I'm all out of having fun doing crash-reboots.

What's wrong here?:

```
struct FontRequester *req = IAsl->AllocAslRequestTags(ASL_FontRequest,
ASLFO_Window, win,
ASLFO_PrivateIDCMP, TRUE,
ASLFO_SleepWindow, TRUE,
ASLFO_TitleText, (STRPTR)"Select Font",
TAG_DONE );
```

```
if(req!=NULL)
{
IAsl->AslRequest(req,NULL);
IAsl->FreeAslRequest(req);
}
```
