Yes, you have been the first step for having OWB on all platforms and I would like to thanks you a lot 😊

I'm IMHO verry happy to see OWB on all platforms and all should allways be like that..

You are verry verry involved on amiga with your programs and be on the shows and active on forums.

I really hope to see joerg coming with use again but I understand that you would like to add gnash to OWB to see both running together....
