To make sure that Roadshow is using the DNS you want, open the file Devs/Internet/name_resolution and check the "nameserver" field. E.g. mine contains

```
# DEVS:Internet/name_resolution  
# File generated by Internet 53.1 (4.7.2008)  
# On Sreda, 22-Jul-09 at 22:02:21  
nameserver=208.67.222.222
```
