URL:

Hello,

I have a SFS error on the caches: partition (where lbrowse save his caches, mainly).

the error is located on 2 drawers:

Caches: has a block ID error au block xxx

expected was block ID 00x.....

but the block is 00x.....

For sure the rules is often do backup of the Aos and third party compoments and on AOS3.x (arrive one time in 10 years) is to save all on medias, reformat and reinstall.

Now with AOS4.x:

- Is it posible to repair SFS errors with special tools or special manipulations or the rule with SFS is the same as with AOS3.x ????
