You're asking for it ! 

KinCon (sp?)...

I run it from the docky... Run SH to compile some code with gcc. Then type exit to quit SH, and then "endcli"... It closes fine, but give me a GR 99% of the time !

I believe it does the same even if I don't run SH...

I'm running AOS4_Upd4 on my A1XE-G4.

(I'm not in front of it at the moment...)

Jerry
