@xenic

At the moment I can't print at all on my OS4.1 system as I am waitiing for RWO to give us a DOT4 USB driver for OS4.1 as my LaserHet 1012 won't work at all via USB till that happens...perhaps your HP might work again with a DOT4 driver??

@ Lio

good idea about categorizing but for now at least if someone has a device they can find it alphabetically & see if anyone else has confimed it working on OS4.1 before they buy it or use it...
