Im running A1G4XE 800mhz. I also tested usb on pci with same results.

You people that have also corruption can write in my thread if you like.

[http://amigaworld.net/modules/newbb/v ... p?topic_id=29086&forum=14](http://amigaworld.net/modules/newbb/v...p?topic_id=29086&forum=14)

I'm getting the same kind of corruption as shown in your picture on the AW.net thread. I've got an A1XE. I've just started using a USB card.

The mp3 player I'm using wasn't recognised until Update 1, so I don't know if it would have happened before the update or not with this device. I didn't used to have any problems with my other USB memory cards. I'm almost afraid to try them now.

EDIT: I tried a 'known good' thumb drive (one that worked fine before update 1) and got the same kind of file corruption.
