Yes, I saw that, I don't think it's re-entrancy as it worked with the previous TuneNet. I'm not doing anything with it until I see the new plugin SDK, but the source is at <http://xmp.sf.net> if anybody wants to look at it in the meantime.

nsbmp datatype - I didn't know anyone used it! I've just updated libnsbmp.so.0 in the archive and re-uploaded. Thanks for the report.
