Jack wrote:

Just installed the update, and found this:

Quote:

```
Ringhio is a system-wide notification server for AmigaOS 4.1 NOLINE
NOLINE: Unknown command
NOLINE failed returncode 10
NOTIFICATIONS is a preference editor for the Ringhio server NOLINE
NOLINE: Unknown command
NOLINE failed returncode 10
No description available NOLINE
NOLINE: Unknown command
NOLINE failed returncode 10
```

I looked with text editor into ringhi binary and found "C:echo %s NOLINE >Ram:tmp.txt" that might provide a clue.

Jack,

Have you found a solution to this problem yet? I just updated DiskImage through AmiUpdate this morning, and now I'm getting this also when I reboot.

Edit:

Ok, I found most of the solution to my problem here:

[http://www.amigans.net/modules/newbb/...t\\_id=45276#forumpost45276](http://www.amigans.net/modules/newbb/...t_id=45276#forumpost45276)

But in my case I had already enabled the Splash Screen on Startup, so I disabled it, rebooted, enabled it, and rebooted back with no more error window.
