Awesome, at last 😊

But, this

V0.92.52 - 03/02/2010

- Tune playing ENV is updated when a tune change occurs during radio streams.
- Delete key deletes tunes within the Reaction GUI. In either standard or filtered view.

doesn't work

Neither env is updated when using radio stations (i tried a few) nor the delete key does anything in the Playlist tab

edit: Nevermind, i had it installed but not updated the path 😊

Working GREAT, thanks a lot
