GREAT!!!!

Only 3 little things:

1 - Plz found a way to show TuneNet window in winbar.docky...I really use it a LOT!

2 - Plz add a doubleclick pop-up mode if when next song notification was displayed and you want to get TuneNet uniconify/in fornt...

3 - Plz add CDDB/FreeDB support...

PS IDv3 TAG support WAS AWESOME! :)

Go ON that way!

TuneNET was a MUST!
