@Snuffy

Thanks for your feedback.

Ok, I see.

No wonder my DVD-rom's reading/writing speed isn't optimal.

However, I still don't understand why my realworld writing speed is 2x faster than the reading speed, and that I am far away from reaching 16MB/sec.

(maybe the OS chooses a slower PIO-mode than reported by IDETOOL?)

I am really looking forward to getting this fixed.
