Hi Chip!

Here is something about the rewriteable dvd handling:

- make sure dvdmrw: is mounted
- put an e.g. nero-formatted DVD+RW in to the drive
- a cd icon will pop up...
- run Sys:system/formatcdrw
- use quick format on the disk
- formatting takes some time...
- a new disk icon is showing

and the problem is:

the old icon of the disk does not disappear
until an eject.

No, I did not leaved any disk window opened.

Please try it on a beta system and share
your findings with us.

Thanks your help!

Bye
