@everyone

Slow, slow, slow thats all I hear about Gnash. And its not even Gnash's fault its flash's fault.

I have an iBook G4 thats starting to gather dust which I have had for 5 years now - the entire time Flash performed like the UK in the Eurovision.

Flash is plain slow there is no getting away from it will never make a difference how good Gnash performs.

The future is not Flash, the future is open-source - the Steve Jobs dream. One which many people the world over subscribe to.
