@Hans

I'm trying to compile OWB, so far I have compiled 5%, I can get every thing working so commented out a few lines her and there, I hope to get download manager working.

The source code in the svn tucnk looks old, does jurge not synchronize?

It looks like the last time that his code was merged into the main repository was 7 months ago. You'll have to talk to Joerg to get updated source-code.
