In support of Joerg, I want to say that I have used OWB since it first came out, through most of the upgrades to OWB 3.29. Of course there have been some issues along the way, but all in all, I support his efforts. I am currently using OWB 3.29.

As for any further upgrades or improvements to OWB, I am not a programmer or a developer so I cannot help there. As a user, I can speak with feedback and donations.

I have used IBrowse, AWeb APL Lite, OWB, NetSurf and Timberwolf Alpha 1 release. In my humble opinion, Timberwolf needs alot more work before it will replace any of the others. Currently, I use OWB 3.29 and NetSurf 2.5 as my main web browsers.
