Since most people seem to think the AmigaOS 4.x port of OWB it's useless crap I guess I wont waste my time on it any more.

Where most people, joerg ????. I have just read the locked thread and just Samo79 would like to see a better gui for owb AOS4 and thats all (and thats understandable).

For me the donations made for OWB was enough (and you have said yourself It's enough, lots of months ago) to show you the great interest for OWB AOS4 for all the versions existed until now.

It's again a not enough developer problem surely and a thread made during a wrong personal time period maybe....
