nope i didn't download that port..

i'd need the developer archive of glib2 though.

edit: so let's try to compile glib...

configure: error: *** pkg-config too old; version 0.16 or better required.

doooh...

edit: so let's try to compile pkg-config then.

what was i originally doing again? :P

edit: no luck there... glib needs to be crosscompiled for now i think.. afxgroup, could you upload your glib2 port?
