I'm in a similar situation, so i decide to contribute a little more learning a bit, if you can accept suggestions, before starting learning complexing language from scratch take a look at this excellent SpotUp Guide

<http://os4depot.net/index.php?function=ment/manual/spots-pfd.lha>

No one IMHO start programming directly, often young developers start learning how to port various little things, then bigger apps etc .. they build an experience with the compilers, configure files etc ... 😊
