@orgin

Can't think of a better arguement to keep it personal and sensible... I think we can safely say that we've established C as the clear winner for me to begin with...

I'm very grateful for everyones input and I'll be happy to carry on discussing and listening to anything else that the thread brings with it...

Hoping in due time I'm not too annoying when I argue a point only discover I don't know enough, I'm hoping I have sense enough to have an adequate percentage of i's dotted and t's crossed before I stand behind my trails of thought 😊

Thanks All!
