@Snuffy and 328gts

Thanks a lot for the kind words, they're much appreciated 😊

@all

Since my proposal of providing a child-proof way of installing software for immediate usage (see the HELPERS page on [glUAE's website](#)) didn't have success (except for the incredibly generous donations by acefnq and 328gts - thanks again once more, friends!), I've decided to make the already existing helpers publically available; the flip side of the coin, quite obviously, is that I will not develop other helpers. As soon as I find the time, I'll upload the helpers and update the page. Stay tuned.
