I know I have allready asked that but what are the maximal size of partition recomanded with:

- SFS
- SFS2
- JFS

Same question when reorganize or repairing with the AOS4 tool, all kind work with the repair/optimize tool ?.

This thread is important because I'm sure pratically all users use SFS or FFS and not look at SFS2 or JFS just because not lots of feedback from users found...

Here 6 partition with SFS used and never try to use more than 60go for a partition..
