@Rigo:

Happy to hear that you're building "Lextras" system to CodeBENCH. It will be for sure a good feature to integrate the AmiDARK Engine :)

Maybe I will not need to build an IDE ;)

Concerning AutoDOC(s), which tool can I use to create AutoDocs ?

@Kas1e:

Quote:

While we already in offtopic: When CodeBench can be purchased ? Why i ask, because free versions are 10 seconds pause for start, that is annoy so much, that can't be usable for fast work

I second your question ;) same here :p

Regards,
AmiDARK
