Just for info:

I can get the game running on Peg2 but the GFX is scrambled and it does not recognize any mouse clicks or key presses. Pictures of a screengrab and what is really seen (digicam) can be viewed here:

And no. It is not just a bad taken photo it is really like this!

Furthermore I got it running completely on my A4000 classic (at least within AOS4.0 but IMHO also within AOS4.1). It is really fast there and as posted within another thread/site you need to load a safed game. Starting over a new one does not work at all! (But save games of each level exists in the WWW!)
