FYI "YOMGUI" from Morphzone, a Morphos dev who did the ports of Blender3d and Python for Morphos has the Video editing aspects of Blender 3d working in a beta state! I think he even had it working with morphos Firewire driver for Capture!!!

I have been doing video editing on my A1 with OS4 using Blender since a couple of months :) The problems is that Blender seems to run too slow on some systems, or not at all because of lack of 3D drivers.
